Module 12 - Console App Assignment - Model Answer

```csharp
using System;

namespace ConsoleAppAssignment
{
    class Program
    {
        static void Main(string[] args)
        {
            //This is a do while loop
            int count = 0;
            do
            {
                Console.WriteLine("Inside the loop");
                count++; //add one to count each time
            }
            while (count < 5); //continue to loop until count reaches 5

            //This is a while loop
            int counting = 0;
            while (counting < 3) //continue to loop until counting reaches 3
            {
                Console.WriteLine("Counting numbers");
                counting++; //add one to counting each time

            }
            Console.ReadLine();
        }

    }
}
```
